KENNETH PARKER
PRIMARY EXAMINER

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: none of the prior art taught or suggested the color filter structure recited in the claims, specifically the grooves in the color filter, each within a corresponding pixel region, and dividing the pixel region into a plurality of domains, with the common electrode formed thereon. Applicant has antedated the prior art of Kim et al. by filing a certified translation of the foreign priority document, thereby perfecting the claim to foreign priority under 35 U.S.C. 119(a)-(d). Applicant's claims are considered patentably distinct from the claims of Kim et al. because applicant's claims do not recite that the common electrode has recesses corresponding to the recesses of the color filter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
